PROFESSIONAL SUMMARY

Data Analyst with a Master of Computer Applications (MCA, CGPA 7.69) and Bachelor of Computer Applications (BCA Hons, CGPA 7.96). Experienced across the full data lifecycle, including data collection, cleaning, exploratory data analysis (EDA), and visualization. Skilled in Python, SQL, Power BI, and Tableau. Proven hands-on experience performing data quality checks, building KPI-driven dashboards, and blending multi-source data into actionable business insights. Strong analytical thinker with a track record of communicating complex findings to non-technical stakeholders to support data-driven decision-making in fast-paced environments.

CORE SKILLS

Data Analysis & Wrangling: Data cleaning, data validation, exploratory data analysis (EDA), multi-source data blending, ETL, data pipelines, data warehousing, trend analysis

Visualization & BI: Power BI (DAX, Power Query), Tableau, Advanced Excel (Pivot Tables, XLOOKUP), Google Sheets, KPI dashboards, data storytelling

Databases & SQL: SQL Server, Oracle, MySQL, joins, aggregation, filtering, query writing, anomaly detection

Statistics & Modeling: Statistical modeling, predictive modeling, classification & regression (Linear Regression, ARIMA, XGBoost)

Programming: Python (Pandas, NumPy), Java

Tools & Platforms: Git/GitHub, Google Workspace (Docs, Sheets, Gmail), Microsoft Office

Core Strengths: Problem-solving, critical thinking, stakeholder communication, cross-functional collaboration, navigating ambiguity, attention to detail

EDUCATION

Master of Computer Applications (MCA) - CGPA: 7.69

Result declared; degree awaited

Swami Vivekananda University, Barrackpore, West Bengal

Bachelor of Computer Applications (BCA Hons) - CGPA: 7.96

Completed Jul 2024

Maulana Abul Kalam Azad University of Technology (MAKAUT), Kolkata, WB

Higher Secondary (Science) & Secondary

2019-2021

Aruar B.M.D.P Institution, Purba Bardhaman, WB - HS: 77.4% | Secondary: 85%

PROFESSIONAL EXPERIENCE

Data Analysis & AI/ML Intern | Ardent Computech Pvt. Ltd., Kolkata, WB

Jul 2023 - Sep 2023

- Enhanced dataset integrity by identifying and resolving structural anomalies in 500,000+ data records using Python (Pandas), improving downstream pipeline accuracy by 15%.
- Evaluated predictive accuracy across 2 supervised machine learning models through comparative performance analysis, increasing prediction precision by 12% for final deployment.
- Translated complex model outputs into actionable insights via KPI dashboards, communicating findings to stakeholders to support strategic decisions and reduce manual reporting time by 20%.

PROJECTS

E-commerce Sales Data Analysis & Predictive Modeling - Major Project

- Built an interactive Tableau dashboard with KPI tracking to improve stakeholder visibility into revenue trends and support business planning.
- Performed rigorous data quality checks, data cleaning, and multi-source data blending on a 30,000+ row, 15-20 column e-commerce dataset using Python (Pandas) and SQL.
- Conducted exploratory data analysis (EDA) to prepare data for forecasting and successfully identify revenue trends.
- Forecasted next-month sales volume by benchmarking 3 models - Linear Regression, ARIMA, and XGBoost - selecting Linear Regression for deployment after it achieved the lowest error rate (MAE INR 22,832; RMSE INR 29,749).

Banking Loan Risk Analysis - Self-Initiated Project

- Built an interactive Power BI dashboard analyzing loan, deposit, and engagement risk across a 5-table relational banking dataset (188 clients) linked via primary/foreign keys.
- Engineered calculated columns (Income Band bins, Engagement Days via DATEDIFF, conditional Processing Fees) and 13 DAX measures (SUM, DISTINCTCOUNT, SUMX, SWITCH) to track \$139.9M in loans, \$111.49M in deposits, and \$5.17M in fees.
- Analyzed loan distribution by income band and nationality, discovering concentration in the Mid-Income segment and among European and Asian clients to inform risk-based lending strategies.
- Delivered a 4-page dashboard (Home, Loan Analysis, Deposit Analysis, Summary) granting stakeholders complete visibility into portfolio metrics.

Weather Prediction Modeling - Internship Project

- Developed a predictive weather forecasting model analyzing historical Kolkata meteorological data using Python (Pandas, NumPy) and time-series analysis techniques.
- Implemented Linear Regression and Random Forest algorithms via Scikit-learn to predict next-month temperature and precipitation, evaluating model accuracy using root mean square error (RMSE).

CERTIFICATIONS

- Machine Learning - NPTEL (IIT) | Jul 2025 - Oct 2025
- Data Visualization with Power BI - Great Learning Academy
- Cyber Security Fundamentals - Tata Strive with Microsoft | Aug 2023 - Sep 2023
